

## **IPAD RAFFLES & TACOS! COME JOIN US!**

### **Rincon Reservation Tribal Community and Tribal Members: We invite you to the Tribe's "Connect Rincon" broadband fair this Saturday, 9/21/24, from 11 AM to 2 PM.**

**TO THE RINCON RESERVATION COMMUNITY AND TO ALL RINCON TRIBAL MEMBERS:** The Rincon Band of Luiseño Indians government invites you to a broadband fair launching "*Connect Rincon*" – a tribal outreach effort to:

- hear from you about your broadband internet needs and wants,
- offer information about the benefits of high-speed broadband internet, and
- keep you informed about Tribe's ongoing efforts to bring high-speed broadband internet services to all households on the Reservation within approximately two years.

The *Connect Rincon* broadband fair will take place at the Rincon Tribal Hall on Saturday, **September 21, 2024**, from **11:00 AM to 2:00 PM**. We appreciate your participation in a survey to collect your ideas about the programs, services, and pricing you would like to experience for the anticipated future of high-speed broadband build-out and services on the Rincon Reservation.

We hope you will bring your family, share your thoughts, enjoy tacos, participate in the raffles to win an iPad, and take home a bag of swag.

Our Rincon tribal government representatives will be present to answer your questions (including representatives from the Education Department), along with representatives from AT&T, the Tribe's broadband deployment partner.

In addition to raffles of multiple iPads\*+, there will be giveaways from both the Tribe and AT&T.

During the *Connect Rincon* event this Saturday, you can also tour the Education Department's AT&T Connected Learning Center. The Connected Learning Center provides the Rincon Reservation community and surrounding tribal communities with high-speed internet access and resources, including digital literacy courses and workshops.

Please come join us!

\*iPads generously donated by AT&T.

+iPad winners must be 18 or older and present proof of Rincon Tribal membership or residency on the Reservation.

---

**Benefits of broadband high-speed internet:** The anticipated arrival of high-speed internet to Reservation households will enhance opportunities for **education** by allowing your children to access online resources and classes seamlessly. It will enable you to apply for jobs and participate in virtual work environments. It can also improve your **healthcare** through tele-health services. Moreover, the availability of high-speed broadband throughout the Reservation is expected to boost **community growth** by bringing new economic opportunities to the Rincon Reservation.
